Model Answer

1.0 V D₂₂ C Suppose initially current assets = RWF 1.5m, and current liabilities = RWF 1m. This RNOV2022 C gives the initial current ratio of 1.5m / 1m = 1.5.0 V 2022 C PARNOV2022 C PARNOV202 C PARNO

When the customer pays, this reduces current assets (receivables) and reduces current liabilities (as the company has an overdraft) by RWF 500,000. So, the current ratio becomes (1.5-0.5)/(1-0.5) = 2. The current ratio has therefore increased.

As everyone else pays on time, removing this overdue debt from the receivable's ledger will reduce receivables days. Therefore, receivables days will decrease. V202210

As the current ratio will increase, and receivables days will decrease, the correct answer is D + all other answers are incorrect. RNOV2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPAR

- 2. A To set up a new credit account, a record is needed of the customer's credit limit and agreed period of credit (so (i) and (ii) are required). Customer contact details are also required to enable queries to be raised and dealt with efficiently and effectively (so (iv) is required). However, customers pay money to the company, not the other way around, so (iii) customer bank details are not required.
- 3. B The revised offer constitutes a counteroffer. A counteroffer acts as a rejection of the initial offer so the original offer comes to an end once a counteroffer is made. Option A is therefore false.

The 'live' offer is therefore the counteroffer, which has been accepted by Company A It is therefore the revised terms that are binding. Option B is therefore true.

Option C is false as the counteroffer has been accepted.

Option D is false as both parties are clearly and explicitly negotiating a contract, hence there is an intention to create legal relations.

4. B When a debt is written off, it is removed from the receivables ledger. However, if it is only provided for, the amount remains on the ledger, and a separate provision is raised in the accounts. Statement (i) is therefore true.

Company B's debts are merely doubtful, so there is some point of recovery. The amount will still be showing on the receivables ledger as outstanding so it should be chased. If it is recovered, the provision can be reversed. Statement (ii) is therefore false

Particularly as Company A's debt will be removed and is overdue, receivables days will reduce as a result. Statement (iii) is therefore true 21CPARNOV2022ICPARNOV202

5. D RWF 3.6m over 18 months equates to 3.6 / 18 = RWF 200,000 per month.

So, the initial credit limit should be $200,000 \times 1.18 = RWF 236,000$ to include VAT which forms part of the balance owed. Option D is therefore correct.

Option A excludes VAT. This is incorrect as VAT forms a part of the balance owed

S3.5 2022ICPARNOV202ICPARNOV202I

Option B builds in 6 months of 10% per month growth as the customer has been a cash customer for 18 months ie $236,000 \times (1.1)^6 = RWF 418,088$. This is incorrect as the company policy states the initial terms should only be one month's sales.

Option C also includes 10% per month growth for 6 months but is based on the net-of-VAT sales $(200,000 \times (1.1)^6 = \text{RWF } 354,312)$ and is therefore similarly incorrect.

- 6. C Statement (i) is **not** appropriate trading on a cash basis should be encouraged to build relationships. Statement (ii) **is** appropriate as it encourages an ongoing relationship.
 Statement (iii) is generally **not** appropriate as it encourages disagreement with established policies. It is more appropriate to be available to discuss the reasoning, but not with a view to changing the decision.
- 7. B Company B, whilst within its 60-day limit, owes more than their credit limit hence this should be reported internally.

 Company A is an already known dispute that will have been reported already.

 Company C is within its agreed extended credit terms in general. The small amount owing over 90 days is not 'significant' as required by the policy for internal reporting.
- 8. C A negative working capital cycle means (receivables days + inventory days) are less than payables days. This means cash is coming in from customers before it is leaving the company to pay suppliers. Option C is therefore correct.

Statement A is incorrect: the length of the working capital cycle doesn't relate to the size of the balances, just how long they are outstanding for.

Statement B is incorrect – this refers to making sales at a cash loss.

Statement D is incorrect – the working capital cycle relates to current assets and liabilities, not equity. V2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV20

9. O A 21 Option A is correct – a garnishee order is appropriate as it requires the debtor's value of the control of the contr

Option B is incorrect – an attachment of earnings order relates to the wages or salary of an individual so is not appropriate for recovering amounts owed from a limited company.

Option C is incorrect – a warrant of execution authorises a court bailiff to seize assets in settlement, but as NARL has no physical assets, this is not appropriate.

Option D is incorrect – a charging order involves attaching a charge to assets so they can then be sold in settlement directly for the amounts owed. NARL has no tangible assets, so this method is not available.

10. B Appeals of Provincial Court decisions are heard in the High Court.

Option A is incorrect – the judgment of the Provincial court is not necessa

Options C is incorrect – appeals are always to a higher court.

Model Answer

MEMORANDUM

To: Finance team, Nyanza Sugar Ltd (NSL)

From: Finance manager

Subject: ICPARGDPR

Date: MANUAL DESCRIPTION OF THE PROPERTY OF TH

Following the recent cyber-attack, one of our major customers has expressed concern that some of their personal information may have been stolen. We agreed contractually with the customer concerned a while ago that we would maintain compliance with the European General Data Protection Regulation (GDPR). To this end, in our next meeting, we will review GDPR as a team. This memo seeks to preface that meeting by clarifying the definition of personal information as far as the GDPR is concerned, and what constitutes good practice in how we should treat customer data.

Personal data

Personal data as far as GDPR is concerned relates to **living natural persons** – companies are therefore not included, nor are deceased people.

Personal data means information which identifies a specific individual, or directly allows for their identification. It also includes any information that indirectly allows for their identification when used in conjunction with other data.

Some data is deemed by GDPR to be more sensitive than others – such as criminal or medical records.

For example, in NSL, a customer's company director's name and contact details are personal data, but information relating to the company they work for is not.

S3.5 Page 5 of 14

Principles of good practice

The following principles can be applied to NSL:

- Information should be fairly and lawfully processed, in line with the data subject's rights: customer contact details should be kept in formal records and held securely. Customers should be made aware we are storing their contact details and the reason we are storing them. We can explain this when the information is gathered (for example on credit account application forms).
- Information should be adequate, relevant and not excessive, and should be processed for limited purposes: only the bare minimum of personal information should be kept. A data audit could be undertaken to cleanse NSL of any superfluous personal data.
- Information should be accurate and up to date and should not be kept for longer than is strictly necessary: customer details should be kept up to date. When they change, all records should change with old information being deleted. This also includes deleting old emails that are out of date and no longer need to be kept.
- Information should be kept securely and not transferred to countries elsewhere unless such data is adequately protected in those countries: Rwanda is developing its own data protection legislation, but this is a work in progress. It may be we seek to store and manage our information overseas in a country that has a GDPR compliant environment for the time being.

QUESTION 12

arking Guide 0v20221CPARNOV20221CPARNOV20221CPARNOV20221CPARNOV20221CPARNOV20221CPARMOV20221CPARNOV202

0 v 0 221C PARNO V 2022 ICPARNO $\overline{10}$ 0 2 $\overline{10}$

Model Answer

Both bankruptcy and insolvency relate to a situation where a debtor cannot or has refused to pay what they owe. Bankruptcy relates to individuals, and insolvency relates to companies. PARNOV2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV2

Gitarama Engineering Ltd (GEL) is a limited company, hence insolvency is relevant in this case

Assuming we have already asked the company exhaustively for payment, there are several courses of action that could be taken by the courts: 221CPARNOV2022ICPARNOV

Garnishee order – this is where the court would insist that GEL's customers pay us directly. This may be appropriate if GEL has sufficient receivables. NOV2022ICPARNOV2022ICP

S3.5 v 2022 i Cparno v 2022 i

Warrant of execution – this is where court bailiffs are appointed to seize assets in settlement of the debt. This might be appropriate if there are sufficient assets that can be sold in a reasonable timeframe.

A receiver could be appointed to enforce payments of amounts owing by GEL.

An administrative order could be actioned requirement regular payments to us until the debt is cleared 22ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202I

Insolvency — petition the court to either appoint a liquidator or an administrative receiver. A liquidator is appropriate if there is no hope of GEL continuing to trade. An administrative receiver on the other hand would try to turn the company around.

Recommendation

The best course of legal action would be to petition the courts for recovery of the debt, and the court case would decide via a court order the most appropriate method of recovery. If there is no cash or assets, either an administrative order or insolvency proceedings may be preferred (to liquidate the company if it has no future or to turn it around if it has a viable future).

Key issues and concerns with the information provided:

Rank reference

Although 'should prove good for your figures' sounds like a positive reference (and it could be prove good for your figures' sounds like a positive reference (and it could be proved good for your purposes' parnovaged would be better, and 'undoubted' better still. The reason for this less-than-perfect bank reference needs to be determined.

S3.5 v 2022i CPARINO v 2022i C

Trade reference

The amount of credit granted by the trade referee is RWF 10 million less than has been applied for from UTL, and KCL occasionally pay late ie over the 30-day terms they have with this supplier. This is a concern given KCL have asked for 60 days credit from UTL and that the reference was put forward by KCL themselves, one would expect it to be 'clean' in this case.

Financial statements

Gross margin: this has reduced despite an increase in turnover. This is a concern if it is a trend as it may indicate costs are spiralling out of control. 2022ICPARNOV202ICPARNOV2

Operating margin: distribution costs have increased proportionately more than revenues. Again, this may indicate costs are out of control PARNOV2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202I

Liquidity and gearing: liquidity has improved, and the average payables days is 30.4 in 2019, which is half the period of credit they have applied for, prompting the question why they wish to apply for 60 days. Gearing has increased only marginally.

(b) V Dear manager Kananza Clothing Ltd (KCL) - credit application

The above customer has applied for credit of RWF 50 million on 60-day terms. KCL have only been a cash customer of ours for a relatively short period – six months – albeit trading with us has increased consistently over that time.

However, the amount of credit applied for is more than twice the current level of monthly purchases, and they have applied for a period of 60 days rather than our standard terms of 30 days. 21CPARNOV20221CPARNO

The bank and trade references, whilst not poor, are not perfect, and there are some indications when reviewing recent financial statements that despite the business growing, profitability has declined lately.

Recommendation

In light of the above, I recommend the credit application on the grounds requested be refused However, we could counter-offer more restricted terms of: NOV2022ICPARNOV202ICPA

Credit limit of RWF 20 million on standard 30-day terms for a period of six months, and if there are no issues in that time, we could look to increase the limit over the next 12 months to the requested limit of RWF 50 million if the volume of trade continues to increase.

During the initial six-month period we should also undertake further research:

- •NOV20 Investigate why the bank reference may be less than perfect
- Obtain further trade references of our choosing PARNOV2022IC
- Obtain a credit report from a rating agency to assist our decision in six months' time

I look forward to receiving either your questions or authorisation for me to action the above.

Kind regards,

Credit team member

Model Answer

(a) Debt collection agencies

These simply administer the collection of debts. The debts would still remain on HRL's receivables ledger.

Advantages: they are experts in their role and are likely to be effective in collecting debts. They can also be used simply to chase specific problematic customers.

Disadvantages: They charge a fee for their services. Customers may not like the official approach of a debt collection agency which could be detrimental to HRL's relationship with that customer.

Debt factoring:

A debt factor provides a combination of services that may include administration of the receivables ledger, finance, and bad debt insurance.

Advantages: like debt collection agencies they are experts in their field so will probably be very effective in collecting debts. The provision of finance can improve liquidity for HRL, and bad debt insurance removes the risk of travel agency groups who may cease trading.

Disadvantages: each of the services cost money so this could be an expensive option for HRL. Customers may not appreciate a third-party collecting money from them which could erode customer goodwill. In addition, HRL may lose the ability to collect money themselves. This may create problems should, for example, the debt factor themselves fail

S3.5 20221CPAKNO V 20221CPAKNO

as a business, or when it comes to renegotiating terms with the factor HRL may be in a disadvantageous position. V2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARN

Early settlement discounts:

This would involve HRL offering, for example, a 1% discount for settlement in say 14 days. PARNO V2022ICPARNO V2022ICPARNO

Advantages: this would improve liquidity for HRL if customers take advantage of the early settlement discount. This discount may also attract new business.

Disadvantages: early settlement discounts are often very expensive. For example, 1% for settlement in 14 days as opposed to 30 days is a simple annualised rate of (very) approximately $24 \times 1\% = 24\%$.

(PCM 3.2)

(b) I recommend utilising the services of a debt collection agency, but only for problematic

Justification:

A settlement discount would have to be offered to all customers, it is expensive and generally unnecessary.

Liquidity is not an issue for HRL. Cash is received generally before payments are made to suppliers, so up-front finance provided by a debt factor is unnecessary.

The occasional use of a debt collection agency means that personal relationships can be maintained with the majority of HRL's customers.

(PCM 3.2)

(c) To: Purchasing manager, Rwandan Paradise Ltd

From: Credit manager, Highlife Resorts Ltd

Subject: Credit terms

Date:PARNOV202XX/XX/XXXX

Dear purchasing manager,

I trust you are well, and that business is good.

Historically, as you know, our Financial Controller has contacted you for payment. As HighLife Resorts Ltd continues to grow, we are finding this approach a little impractical, and we have recently decided to formalise our approach to collections.

This doesn't change our standard terms with you of 30 days, but it does mean collection is more likely to be via a debt collection agency, Kigali Customer Services Ltd, who are being tasked to collect in accordance with our standard 30-day terms.

Your account at present is approximately four months overdue, and as a gesture of goodwill we are prepared to allow a grace period of three months to bring the account back within the

S3.5 v 2022 i CPARINO v

EICPARNOV 30-day limit before we switch over to Kigali Customer Services Limited. I do hope you find PARNOV2022ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARNOV202ICPARN

2022ICPARNOV I hope you understand this new approach is to manage the time of our financial controller, PARI and to manage our working capital requirements in the future to ensure we can all continue to grow profitably.

Model Answer

(a) V Kimenyi Builders

Although there are some overdue amounts on the account, the net amount owing is zero. The RWF 5,000 million credit may well need applying to the aged debts. It could be unallocated cash, or a recently raised credit note. This needs clarification before any further action is taken.

Kicukiro Housing

Kicukiro Housing is operating within its agreed credit terms. However, KCL are aware there may be problems with this customer. Further trading should cease while rumours are investigated. If the rumours prove to be founded, it is recommended that this account is passed to the debt collection agency as soon as it is due for payment.

Manzi and Son Ltd

RWF 1,000 million is overdue by more than two months. However, there is a credit of RWF 1,000 million in the 1–2-month column. It may be unallocated cash or a credit note relating to the old amount. This should be investigated before taking any further action.

Gicumbi Construction

Gicumbi construction owe RWF 4,000 which is more than two months overdue. Despite the promise they have made to pay, this should be passed to the debt collection agency in line with policy to ensure payment is received.

Rulindo Civil Engineering

The balance of RWF 5,500 million is clearly overdue. However, the company is in the process of liquidation. There is little point in incurring the fees of a debt collection agency as it is unlikely to increase the chances of recovery. Assuming KCL has already been contacted by the liquidator, no further collection procedures are necessary at this time.

(b) Assuming a debt collection agency is used to collect the Gicumbi Construction (RWF 4,000 million 2 months + overdue) and Kicukiro Housing (RWF 7,000 owed):

RNOV2022ICPARNOV2022ICPARNOV2022ICPARNOV2022ICPARNOV2022ICPARNOV20	RWF million 22
Cost: flat fee: 2 × RWF 75m NOV2022ICPARNOV2022ICPARNOV2022ICPARNOV20	^{22ICPARN} (150) ²²
Cost: Fee relating to size of debt: $5\% \times (4,000 + 7,000) =$	(550) ²²
Benefit: Average increased recovery: $(75\% - 60\%) \times (4,000 + 7,000) =$	221CPAR 1650
Net benefit of using the debt collection agency	221CDA PNI 950 022

(c) Assuming the debt collection agency is not to be used, the following doubtful debt allowance is recommended:
